

LUBRICATION EQUIPMENT · MADE IN GERMANY

UMETA

We make it move.

If you ever see a grease nipple anywhere, it's most probably one of ours. After all, since 1926 UMETA has been the address for high-quality manual grease technology, which, unlike many other companies, we are still producing in Germany. And we plan to carry on doing so.

Our manufacturing plant is in Bielefeld

because we owe everything to this region and to the people who live here!

This is where we at UMETA live and work. This is where we create quality, with expertise, experience, and highly up-to-date production plants. It's no coincidence that grease nipples and grease guns from UMETA are known throughout the world for their durability and functional safety. One of our special strengths is our enormous flexibility when it comes to customer wishes. If someone needs a custom-made solution for his special design requirements, then he gets it - without any ifs or buts. We place a high priority on first-class advice and customer care. This is why we were the first company in the industry to not only be certified by TÜV in accordance with DIN ISO 9001:2000 but also for "customer satisfaction and quality of service". As a modern, family-run company with tradition, we aim to represent dependability and reliability and remain a trustworthy partner well into the future.

Why not check us out yourself!

Yours

A handwritten signature in black ink, appearing to read 'Frank Heuer'. The signature is fluid and cursive, with a large, stylized 'F' and 'H'.

FÖRDERVEREIN

GOOD HOPE CENTRE E.V.

UMETA ACCEPTS RESPONSIBILITY!

We are fortunate enough to be able to live in an affluent society, but we also have an obligation to help people who do not share this luck.

UMETA supports social institutions in Germany, for example the Children's Cancer Clinic in Bielefeld, sports clubs, charitable organisations etc. Since 2007, UMETA has also given considerable commitment to Tanzania, one of the 10 poorest countries in the world.

For us at UMETA it is intolerable that one side of the world has plenty, and that on the other side of the world abandoned orphans are starving or dying of AIDS. Anyone who has personally experienced this will never be able to banish the images as long as they live. To fight this appalling situation, we founded the Good Hope Centre funding association in September 2007 together with some good friends.

Since then, our work at the foot of Mount Kilimanjaro has been producing a home for orphans as well as a primary school. This Happy Watoto Homes & Schools in Ngorika provides "our" 120 orphans, in addition to 160 needy children from the local area, optimum future prospects through a protected childhood and good education.

This "village" has been opened since May 2011.

We are receiving considerable support from various directions such as business partners, personal friends, visitors to our funding events, well-known people or politicians. Despite this, we need to be able to permanently safeguard the operating costs for our home. I therefore ask you:

Please help us! "Our children in Tanzania" depend on your help!

WWW.GOOD-HOPE-CENTRE.DE

Please visit our homepage www.good-hope-centre.de and inform yourself about the various ways you can help us. Why don't you join our funding association?

Unfortunately we can't save the whole world, but everyone here at UMETA is doing their very best to do what is possible within our means. Please help us to achieve this!

I would like to thank you wholeheartedly in the name of "our children" and all the committed staff at UMETA for your help!

Best regards,

Frank Maser

PETER MAFFAY

"I REALLY WOULD LIKE TO PRAISE THE GOOD HOPE CENTRE FUNDRAISING ASSOCIATION FOR ITS EXCELLENT WORK! I WILL SUPPORT YOU HOWEVER I CAN!"

ULI STEIN

"IT IS A REAL ACHIEVEMENT TO SUPPORT SUCH A FANTASTIC ACTION NOT JUST PASSIVELY, BUT TO ACTIVELY PARTICIPATE AS WELL. I REALLY HOPE WE WILL BE ABLE TO ACHIEVE A LOT WITH OUR ASSOCIATION"

UDO LINDENBERG

"I AM EXTREMELY PLEASED THAT I CAN SUPPORT YOUR WORK WITH THE "UDO LINDENBERG FOUNDATION". KEEP UP THE GOOD WORK! AHOI, UDO"

WERNER SCHULZE-ERDEL

"IT IS REALLY NICE TO BE ABLE TO WORK WITH YOU. I'M REALLY LOOKING FORWARD TO THE MANY FUTURE ACTIONS AND EVENTS WHERE I CAN HELP YOU."

ALFONS SCHUHBECK

"THERE REALLY SHOULDN'T BE ANY CHILDREN IN NEED! THAT IS WHY I AM REALLY PLEASED TO HELP."

AXEL SCHULZ

"NO MATTER HOW, YOUR CHILDREN IN TANZANIA CAN ALWAYS COUNT ON ME!"

■ UMETA PRODUCTS

Quality – safety – flexibility ***UMETA keeps your machines moving***

For more than 80 years, UMETA lubrication products have been guaranteeing reliable maintenance and upkeep of high-quality machines and equipment. Even nowadays, breakdowns caused by non-lubricated or incorrectly lubricated equipment can cost millions.

To keep your equipment permanently moving, we can offer the largest range of lubricating nipples available the whole world over in addition to grease guns and accessories for all application areas. We know exactly how important good tools are for effective work, and would be pleased to advise you at any time. Our aim is to find an optimum solution for every lubrication problem, whether direct by using our huge standard range, or even using products which we develop together with your company.

Speed counts! This is why a large part of our program is permanently available to you from stock.

We produce our high-quality lubrication technology exclusively in Germany. The established UMETA quality is guaranteed here by highly-modern production facilities, certified quality management and innovative product management.

Turned parts to customer specifications are now playing an increasing part within our company. In this case, we can fall back on decades of experience and the knowledge gained from lubricating technology. Our customers value the flexibility and reliability of our automatic devices and CNC lathes. Combination of this department with the assembly sector allows us to process complex components and to produce in variable dimensions, materials and batch sizes.

GREASE GUNS

* Subject to our guarantee terms and conditions which can be found at www.umeta.com

UMETA grease guns stand for highest quality and reliability.

We are certain of the quality of UMETA products and have a guaranty of four years for all UMETA TWIN-LOCK® grease guns with respect to function. Accurate manufacturing, high quality materials and intelligent product features turn our guns into effective precision tools that effortlessly reach high lubricating pressures.

UMETA TWIN-LOCK® grease guns will be delivered with a user's manual, either in a polybag, or in a coloured cardboard box.

All UMETA TWIN-LOCK® grease guns for 400g (14.0 oz.) grease cartridges comply with DIN 1283 as regards physical dimensions and performance and are suitable for grease cartridges according to DIN 1284.

Our grease guns 75/PK und 75/PL are DLG-certified

Of course, our quality management is ISO 9001-2008-certified

UMETA GREASE GUNS – ADVANTAGES AT A GLANCE

- UMETA TWIN-LOCK® system
- rolled coarse thread for high stability and easy disassembly
- special pressure stability by cast aluminium head and thick-walled barrel
- easy insertion of the plunger into the cartridge by a bulge in the barrel
- inner cartridge stopper
- stable hand lever with security handle
- ergonomic T-grip with jam protection
- knurled barrel for better hold and grip
- separate air release valve or filler valve
- special constructions available
- colours and imprints as per customer's request
- individual packaging
- high wearing security
- even after 30,000 strokes no wear is detectable
- available according to DIN 1283
- wide range of accessories

■ UMETA TWIN-LOCK®-SYSTEM – THE LIFE INSURANCE FOR YOUR MACHINES AND EQUIPMENT

When maintaining your high quality machines and equipment, you should absolutely avoid quasi-lubrication!

What does quasi-lubrication mean?

Upon continuous operation, abrasion can easily take place between the metal piston and the metal cylinder of the grease gun. For this reason, the grease at the top of the piston can be pressed back into the cartridge at a low operating pressure without being noticed. In spite of all efforts, no grease will be transported to the lubrication spot. In order not to expose your machines to this risk, we developed the UMETA TWIN-LOCK® system. In connection with two special sealing elements, it protects the precision piston from wear upon continuous operation. By the special arrangement of the sealing elements, the UMETA TWIN-LOCK® system avoids quasi-

without UMETA TWIN-LOCK® System

with UMETA TWIN-LOCK® System

lubrication and grease escaping the piston. The sealing elements are designed in a way that they adjust themselves to the corresponding operating pressure with respect to their sealing effect. For this unique advantage UMETA grease guns are worldwide renowned.

■ UMETA EVER-FLOW SYSTEM

The patented EVER-FLOW system invented by UMETA ensures perfect functioning of the UMETA TWIN-LOCK® gun, even with thick grease and at the lowest temperatures. This is ensured by an outlet valve equipped with a special ball stopper. Even semifluid biological grease will easily be transported by the vacuum developing during the pumping process. This is another advantage of UMETA's, where many other competitors' products fail.

■ UMETA GREASE GUN KITS

The well-established UMETA accessories for grease guns offer you the optimal solution for any application. We assembled the most common grease gun kits, which consist of the UMETA grease gun of your choice and the following standard accessory parts.

► Our most common standard kits:

110/G – nozzle tube with hydraulic coupling

340/GLN – hose 300 mm (12") with hydraulic coupling

Grease gun equipped with standard air release valve

Grease gun equipped with standard filler valve

Grease gun equipped with standard filler valve and nozzle tube

HAND LEVER GREASE GUNS

75/PK Silver

barrel version	silver painted steel barrel – DIN 1283 special colours available Ø 56 mm (2.2")
barrel length	296 mm (11.6")
suitable for	grease up to NLGI 3
filling capacity	400 g (14.0 oz.) grease cartridge / 500 ccm (16.0 oz.) bulk grease
connection thread	M 10 x 1 oder G 1/8 upon request 1/8 NPT

Connection	Packed in	Scope of delivery	Ref. No.:

UMETA TWIN-LOCK® Ultra Case Kit

The complete lubricating equipment in a handy carrying case. The carrying case contains everything you need for lubricating anything, especially our **UMETA TWIN-LOCK® Ultra Grease Gun 75/PKU according to DIN 1283**. The carrying case kit comes with the practical UMETA hose parking unit. The grease gun can be hung up on the wall by the provided wall bracket, and is thus always at hand. With the many accessories, you will be prepared for any needed application.

Accessories kit, consisting of:

- hydraulic hose 340/GLN
- nozzle tube 110/G
- hydraulic coupling 515/G-4
- quick-adaptor, short version
200/M 4, 200/M 1, 200/M 22, 200/S, 200/XS
- grease nipple assortment 60s, each 5 pcs. H1/H2/H3
6 x 1, 8 x 1, 10 x 1, R 1/8
- grease cartridge 400 g (14.0 oz.)
- hose parking unit at hand lever
- wall bracket

Hand Lever Grease Gun with pressure gauge

- pressure gauge grease gun for the exact control of the lubricating pressure in order to protect pressure-sensitive components, bearings and gaskets
- for 400 g (14.0 oz.) grease cartridges or 500 ccm (16.0 oz.) bulk grease
- with high quality zinc-plated steel barrel
- with UMETA TWIN-LOCK® system und patented EVER-Flow system
- standard air release valve, alternatively with filler valve according to DIN 1283

barrel length	296 mm (11.6")
suitable for	grease up to NLGI 3
filling capacity	400 g (14.0 oz.) grease cartridge / 500 ccm (16.0 oz.) bulk grease
connection thread	M 10 x 1 or G 1/8 upon request 1/8 NPT
operating pressure	400 bar / 5,800 PSI
output	approx. 1.9 ccm (0.06 oz.) / stroke
testing pressure	800 bar / 11,600 PSI
gun dimension	480 x 130 x 60 mm (18.9 x 5.1 x 2.36")
packed in	printed UMETA polybag
weight	1,555 g (54.8 oz.) + accessories and packaging

pressure gauge up to 1,000 bar

Connection	Packed in	Pressure release	Ref. No.:

AIR-OPERATED GREASE GUNS

DRP 30

Inclusive extension tube and hose with hydraulic coupler

Air-operated grease gun

- for 400 g (14.0 oz.) grease cartridges or 500 ccm (16.0 oz.) bulk grease
- continuous grease flow
- extra light and handy due to aluminium body with ergonomic handle
- compressed air connection for quick coupling
- comes with nozzle tube and HP hose according to DIN 1283
- comes with air release valve and separate filler valve (DIN standard)

barrel version	made of zinc-plated steel DIN 1283 special colours available Ø 56 mm (2.2")
barrel length	296 mm (11.6")
suitable for	grease up to NLGI 3
filling capacity	400 g (14.0 oz.) grease cartridge / 500 ccm (16.0 oz.) bulk grease
standard valve	air release valve and separate filler valve (DIN standard)
connection thread	G 1/8
pressure ratio	40:1
air pressure	3 – 7 bar, 43.5 – 100 PSI; recommended air pressure 6 bar/90 PSI

operating pressure	280 bar / 4,060 PSI max.
output	approx. 500 ccm/3 min. or 160 ccm (5.1 oz.)/min.
testing pressure	320 bar (4,640 PSI)
gun dimension	405 x 260 x 60 mm (15.9 x 10.2 x 2.36")
packed in	printed UMETA multi colour cardboard box
weight	1,385 g (48.8 oz.) + packaging
dimensions (L x Wx H)	425 x 185 x 80 mm (16.7 x 7.3 x 3.15")

Connection	Packed in	Scope of delivery	Ref. No.:
G 1/8	cardboard box	complete with accessories: - HP hose Ø 13 (1/2") mm, 300 mm (12") length - nozzle tube 110/G each with hydraulic coupler	7437505

PUSH-TYPE AND SCREW-TYPE GREASE GUNS

The UMETA programme offers the optimal solution for all lubricating needs. Either with shock-resistant polyamide bodies, or made of high quality zinc-plated steel, with or without telescopic tube: you will find the right push-type grease guns for all sizes and requirements.

Push-type grease guns stand out for their handiness and easy operability. Light pressure suffices to allow for the effective lubrication of hydraulic nipples, ball-type and flush-type nipples. The UMETA telescopic push-type grease guns are equipped with a telescopic tube and are therefore suitable for harder to reach applications.

With our nozzles, you will find the optimal connection to any lubricating nipple according to DIN. UMETA push-type grease guns are equipped with special nozzles M 9 x 1. Just choose the desired push-type grease gun with the suitable nozzle for your lubricating nipple type from the list!

OIL GUNS

UMETA oil guns are specially designed for operation with oils and high-viscosity grease, and they are manufactured with the same high quality as the well-established UMETA grease guns. Sealing elements and accessory parts specially designed for this purpose allow for optimal leakproof oil fittings.

70/PKO

barrel version	shock-resistant polyamide barrel Ø 60 mm (2 1/8")
barrel length	292 mm (11 1/2")

ACCESSORIES FOR GREASE GUNS

UMETA original accessories for grease guns offer a wide range of application possibilities. Therefore, you will be able to solve any lubricating needs with our accessories.

If not, we as an experienced manufacturer, will find a solution together with you.

NOZZLE TUBES

UMETA nozzle tubes in a straight or bent version allow for most simple, tool-free assembly by a polyamide butterfly nut, which guarantees an optimal sealing effect and which makes it possible to stabilize the bent nozzle in any desired position.

► nozzle tubes with connection thread 1/8-NPT upon request

nozzle tubes with connection G 1/8 are marked by a blue butterfly nut

110/G

- nozzle tube, bent
- with hydraulic coupler
- length 170 mm

Type	Connection	Ref. No.:
110/G	M 10 x 1	V000279
110/G	G 1/8	V000337

100/G

- nozzle tube, straight
- with hydraulic coupler
- length 170 mm

Type	Connection	Ref. No.:
100/G	M 10 x 1	V000044
100/G	G 1/8	V000155

110/S

- nozzle tube, bent
- with pointed nozzle
- length 154 mm

Type	Connection	Ref. No.:
110/S	M 10 x 1	V000316
110/S	G 1/8	V000285

100/S

- nozzle tube, straight
- with pointed nozzle
- length 154 mm

Type	Connection	Ref. No.:
100/S	M 10 x 1	V000247
100/S	G 1/8	V000253

110/H

- nozzle tube, bent
- with hydraulic nozzle
- length 150 mm

Type	Connection	Ref. No.:
110/H	M 10 x 1	V000103
110/H	G 1/8	V000375

100/H

- nozzle tube, straight
- with hydraulic nozzle
- length 150 mm

Type	Connection	Ref. No.:
100/H	M 10 x 1	V000076
100/H	G 1/8	V000055

95/G

- nozzle tube, bent
- without butterfly nut
- with hydraulic coupler
- length 170 mm (6 1/2")

Type	Connection	Ref. No.:
95/G	M 10 x 1	V000398
95/G	G 1/8	V000154
95/G	1/8 NPT	V000101

90/G

- nozzle tube, straight
- without butterfly nut
- with hydraulic coupler
- length 170 mm (6 1/2")

Type	Connection	Ref. No.:
90/G	M 10 x 1	V000074
90/G	G 1/8	V000054
90/G	1/8 NPT	V000072

NOZZLES AND HYDRAULIC COUPLERS

Hollow-type nozzle

- suitable for ball-type and hydraulic-type nipples acc. to DIN 71412

outer Ø 12 mm
height 8.5 mm

Type	Connection	Ref. No.:
500	M 9 x 1	7351461
501	M 10 x 1	V000100
502	G 1/8	V000227

Pointed nozzle

- suitable for flush-type nipples acc. to DIN 3405

outer Ø 12 mm
height 18 mm

Type	Connection	Ref. No.:
500/S	M 9 x 1	7351161
501/S	M 10 x 1	V000248
502/S	G 1/8	V000254

Pin pointed nozzle

- suitable for flush-type nipples acc. to DIN 3405

height 16 mm
spanner size 11

Type	Connection	Ref. No.:
500/NS	M 9 x 1	7351561
501/NS	M 10 x 1	V000246
502/NS	G 1/8	V000252

Hydraulic nozzle

- suitable for ball-type and hydraulic-type nipples acc. to DIN 71412

outer Ø 12 mm
height 15 mm

Type	Connection	Ref. No.:
500/H	M 9 x 1	7351261
501/H	M 10 x 1	V000104
502/H	G 1/8	V000250

Combo-nozzle hollow/pointed

- suitable for two different applications by just unscrewing/screwing the desired nozzle

outer Ø 12 mm
height 28 mm
spanner size 11

Type	Connection	Ref. No.:
500/K	M 9 x 1	7351061
501/K	M 10 x 1	7351031
502/K	G 1/8	7351041

Hydraulic coupler

also available with turned jaws upon request

- standard with 4 punched jaws
- suitable for hydraulic-type nipples acc. to DIN 71412

outer Ø 15 mm
height 36 mm
spanner size 13

Type	Connection	Ref. No.:
515/G	M 9 x 1	7353361
515/G	M 10 x 1	V000077
515/G	G 1/8	V000106
515/G	1/8 NPT	V000102

Angled hydraulic coupler

- standard with 4 punched jaws
- suitable for hydraulic-type nipples acc. to DIN 71412

outer Ø 15 mm
height 36 mm
width 27 mm
spanner size 14

Type	Connection	Ref. No.:
515/G-S	M 10 x 1	7351314
515/G-S	G 1/8	7351315
515/G-S	1/8 NPT	7351317

Hydraulic coupler, heavy-duty hexagon

- standard with 4 punched jaws
- suitable for hydraulic-type nipples acc. to DIN 71412

· with ball valve
outer Ø 15 mm
height 48 mm
spanner size 17

Type	Connection	Ref. No.:
512/G	M 10 x 1	7351316
512/G	G 1/8	7351326
512/G	1/8 NPT	7351376

Bayonet coupler

- suitable for bayonet nipples

outer Ø 16.5 mm
height 37 mm
spanner size 17

Type	Connection	Ref. No.:
517/B	M 10 x 1	9140215
517/B	G 1/8	9140216
517/B	1/8 NPT	9140217

Button-head coupler

The UMETA slide coupler is equipped with the hose connection either at the top, or at the side – and it is made of aluminium or steel for optimal handling – according to each application. You achieve additional flexibility by using a swivel joint.

· according to DIN 1283

Sidewise connection

Dimensions	M 4	M 1 + T 1	M 22

► Sealing kits for slide coupler, consisting of sealing, spring, and metal ring, are available in different versions and sizes.

► Further special versions upon request, e. g. those for using resins.

►  Button-head coupler with connection possibility on both sides upon request.

Swivel joint

For a flexible assembly between hose and coupler, we recommend using a UMETA swivel joint. With a UMETA swivel joint, the coupler can be turned to any desired position without having to hold the grease gun in an inappropriate position.

length	30 mm
weight	11 g
outer Ø	14 mm

WALL BRACKETS

- Wall bracket for UMETA TWIN-LOCK® Grease Guns

With the robust wall bracket made of zinc plated steel you obtain a steady-state greasing station for your UMETA grease gun.

After having mounted the bracket to the wall, the grease gun will be fixed with the clamping collar.

Now, the grease nipple has to be connected with hose and nozzle and can be lubricated very comfortable directly from the wall station.

For changing the grease cartridge the gun tube can be removed while the grease gun remains in the bracket.

Type	Ref. No.:
Wall bracket (open version), cpl. set	7092100
Wall bracket (closed version), cpl. set	7092110
Wall hook	6900099

GREASE CARTRIDGES

UMETA grease cartridges according to DIN 1284

filling quantity	400 g (14.0 oz.)
thaw point	180 °C/356 °F
NLGI class	2
packing unit	24 pcs.

Super lithium multipurpose grease

- cartridge according to DIN 1284
- suitable for lubricating normally strained bearings
- suitable for all grease guns according to DIN 1283
- universally applicable

application temperature	-30 °C/ -22 °F up to
upon permanent operation	+120 °C/ 248 °F
temporarily	up to +130 °C/266 °F

Packing unit	Ref. No.:
24 pcs.	7371953

■ GARAGE EQUIPMENT

Get the practical devices for daily works in the garage from UMETA as well!

We offer you the complete programme of handling systems, such as suction and filling devices, or fully equipped grease gun carrying cases, e. g.

■ SUCTION GUNS

Suction Guns are practical and reliable devices for suction and delivery of oils and high-viscosity grease. They stand out by their ergonomic handle, robust design, and they are easy to operate.

For an optimal sealing effect, they are always equipped with a double sleeve. Here, too, we carry a complete accessories programme, e. g. connection nozzle tubes and flexible hoses.

Type 2

barrel version	made of zinc-plated steel
	Ø 42 mm (1.65")
barrel length	260 mm (10.2")
suitable	for oil and high-viscosity grease
filling capacity	250 ccm (8.75 oz.)
connection thread	M 10 x 1

Connection	Ref. No.:
M 10 x 1	7222143

Suction Gun

· for a 250 ccm content

packed in	polybag or bulk
weight	440 g (15.5 oz.) + accessories and packaging
dimensions	42 x 290 mm (1.65" x 11.4")

Type 3

barrel version	zinc-plated steel, yellow passivated
	Ø 50 mm (2.0")
barrel length	295 mm (11.6")
suitable	for oil and high-viscosity grease
filling capacity	500 ccm (17.5 oz.)
connection thread	M 10 x 1

Connection	Ref. No.:
M 10 x 1	7233113

Suction Gun

· for a 500 ccm content

packed in	polybag or bulk
weight	560 g (19.8 oz.) + accessories and packaging
dimensions	56 x 350 mm (2.2" x 13.8")

Type 4

barrel version	zinc-plated steel, yellow passivated
barrel length	Ø 56 mm (2.2")
suitable	446 mm (17.6")
filling capacity	for oil and high-viscosity grease
connection thread	1,000 ccm (35.0 oz.)
	M 13 x 1

Suction Gun

- for a 1,000 ccm content

packed in	polybag
	or bulk
weight	1,065 g (37.6 oz.)
	+ accessories and packaging
dimensions	61 x 530 mm (2.4" x 20.9")

Connection

M 13 x 1

Ref. No.:

7244313

Type 2/V

Suction Gun with reversing valve

- for a 250 ccm content

The reversing valve of type 2/V allows for most simple transfer of liquids from one container to another.

barrel version	made of zinc-plated steel
barrel length	Ø 42 mm (1.65")
suitable	270 mm (10.6")

Filling cylinder

for central lubrication systems

- for fast filling of central lubrication systems with grease and high-viscosity grease
- suitable for bulk grease and for grease cartridges of 400 g

barrel version	made of zinc-plated steel
barrel length	Ø 56 mm (2.2")
suitable	370 mm (14.6")
filling capacity	for grease and high-viscosity grease
	400 g (14.0 oz.) grease cartridge / 500 ccm (17.5 oz.) bulk grease

packed in	polybag
	or bulk
weight	960 g (33.9 oz.)
	+ packaging
dimensions	64 x 460 mm (2.5" x 18.1")

Ref. No.:

5556010

OTHER GARAGE EQUIPMENT

UMETA TWIN-LOCK® Ultra Case Kit

The complete lubricating equipment in a handy carrying case, which contains everything you need for any application, especially our **UMETA TWIN-LOCK® Ultra Grease Gun 75/PKU according to DIN 1283**. The carrying case kit comes with the practical UMETA hose parking unit. The grease gun can be hung up by the provided wall bracket, and is thus always at hand.

UMETA TWIN-LOCK® Ultra Grease Gun 75/PKU

Top model, which combines quality, function and design.

- for 400 g (14.0 oz.) grease cartridge / 500 ccm (17.5 oz.) bulk grease
- ergonomic grips made of anti-slip material
- filler valve, DIN 1283 included
- with TWIN-LOCK system and patented EVER-Flow system

Accessories kit, consisting of:

- high pressure hose 340/GLN
- nozzle tube 110/G
- hydraulic coupler 515/G-4
- quick-adapter, as short version
200/M 4, 200/M 1, 200/M 22, 200/S, 200/XS
- grease nipple assortment 60s, each 5 pcs. H1/H2/H3
6 x 1, 8 x 1, 10 x 1, R 1/8
- grease cartridge 400 g
- hose parking unit at hand lever
- wall bracket

UMETA Filling Device for Grease Guns

All grease guns with a DIN filler valve can be filled from the bucket easily and safely by the inclined filling coupler. With variable screw-on features, the filling devices work with all common bucket sizes. The loose lid protects against dirt and grime and serves for simple control of filling height at the same time.

UMETA Oil Cans *

Stand out for the following advantages:

- precision double-pumping system made of brass
- high pressure performance
- large filling hole
- red stove enamelling
- easy to disassemble, therefore, easy to clean
- enormously stable due to large bottom
- packed: 12 pcs. per size in cardboard box

Type	Nominal content	Connection	Net weight	Ref. No.:

GREASE NIPPLES

Maintaining permanent motion!

They are small and inconspicuous, but responsible for keeping machines and all kinds of equipment in motion - whether in a harvester in Russia, a pipeline in Alaska, or a brewery in Australia. There is a UMETA Grease Nipple for every application purpose in most sizes, types and composition. With a range of more than 1,500 different types of nipples with about 70 different thread forms, we offer the largest product line worldwide.

Depending on the application and the installation sites, we can manufacture grease nipple according to international standards. Other than a standard version made of steel, zinc-plated and passivated, we offer many other types, made of brass or stainless steel. You will always find a solution in our range of products - even for the most challenging application. Rely on us - since we are manufacturer and not a dealer - for about 80 years!

UMETA GREASE NIPPLES - ADVANTAGES AT A GLANCE

- 1,500 available types
- hydraulic-type-, ball-type-, flush-type-, bayonet-, and button-head nipples
- standard versions made of zinc-plated steel, stainless steel, or brass
- case-hardened according to DIN
- international product standards (e. g. DIN, ISO, SAE, BS, JIS)
- individual, custom-designed solutions
- individual packaging according to customers requirements

FUNCTION OF A GREASE NIPPLE

TASKS OF A GREASE NIPPLE

- protection of the lubrication point against dirt and humidity — no sealing against internal pressure
- standardized connection to the grease gun
- essential for maintenance and repairs

RANGE OF APPLICATIONS

- bearings
- hinges for machines, vehicles, industry
- cardan shafts
- drive shafts
- linear guides
- hydraulic cylinders
- drives
- chains
- axels

GREASE NIPPLES ARE MANUFACTURED OF

- steel: 1.0718 (11SMnPb30+C) SAE 12L13
- stainless steel: 1.4305 ~ ASTM303 (SST303); 1.4401, 1.4404 ~ ASTM316, 316L (SST316L)
- brass: CuZn39 Pb3 (CW614N)

UMETA HYDRAULIC-TYPE GREASE NIPPLES ACCORDING TO DIN 71412

APPLICATION AREA

UMETA hydraulic-type nipples are suitable for all standard lubrication points, which have to be frequently lubricated in a reliable way. Due to their multi-purpose field of application, they are the most commonly used types of grease nipples.

VERSIONS

In general, our hydraulic-type grease nipples according to DIN are made of steel, case-hardened, zinc-plated and passivated, and they are featured with a tapered thread. The head diameter is 6.5 (-0.2) mm / 0.256" (- 0.008"). For safety reasons and in order to avoid abrasion wear, the standard demands 550 HV as a minimum for a surface hardness. Therefore, we operate this decisive process in our own curing oven. We offer various standard types also in brass or stainless steel 1.4305 ~ ASTM 303 and 1.4404 ~ ASTM 316L (V2A/V4A). Of course, our hydraulic-type nipples are also available in different angle versions, with a self-forming thread, or as drive-in type.

SPECIAL VERSIONS

Upon request, UMETA manufactures hydraulic-type nipples in other versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with cylindrical thread)
- opening pressure
- surface colour (e. g. yellow passivated)
- further surface treatment
- unhardened
- etc.

MOUNTING INSTRUCTIONS

In order to allow for a proper lubrication with all common grease guns, the head space, which is necessary for installation, should be considered (please see table with dimensions).

OPERATING INSTRUCTIONS

As suitable lubricating nozzle, we recommend our hydraulic couplers.

Head space			
A =	50 mm (1.97")	D =	25 mm (0.98" - $\frac{63}{64}$ ")
B =	16.5 mm (0.65")	E =	75 mm (3")
C =	19 mm (0.75" - $\frac{3}{4}$ ")	F =	55 mm (2.16" - $2 \frac{1}{8}$ ")

Type H1

Hydraulic-Type Grease Nipples

- according to DIN 71412
- straight version A/180°
- standard versions according to DIN are made of steel, case-hardened, zinc-plated and passivated
- made of steel, zinc-plated and passivated

Type H2

Hydraulic-Type Grease Nipples

- according to DIN 71412
- angled version B/45°/67°
- optionally available with square or hexagonal body
- standard versions according to DIN are made of steel, zinc-plated and passivated, head case-hardened
- with tapered thread
- for other types and materials, please see table, or upon request

■ UMETA HYDRAULIC GREASE NIPPLES WITH SELF-FORMING THREAD

APPLICATION AREA

By using UMETA grease nipples with self-forming thread (SFT / SFG) you effectively save the thread-cutting process in the borehole.

VERSIONS

For safety reasons and in order to avoid abrasion wear, the DIN standard for grease nipple with self-forming thread demands a specific surface hardness of 650 HV minimum as well as a particularly wide flank angle of 105° at the thread. For a better visual distinction, UMETA self-forming grease nipples are yellow passivated. Upon request, they are also available in another surface colour, e.g. blue passivated = silver coloured.

MOUNTING INSTRUCTIONS

The special thread angle and the specific hardness level allow these grease nipples to be driven and screwed into holes without prior thread cutting. Thus, the thread of the grease nipple forms its counter thread. Later, the grease nipple can easily be screwed out and be replaced by a standard grease nipple. The exact size of the core hole depends on the material and must be determined by mounting tests. The consistency of the receiving material is decisive. The standard gauge for the installation bore diameter of 0.4-0.5 mm (0.02") below nominal width have proved in daily use.

OPERATING INSTRUCTIONS

As suitable lubricating nozzle, we recommend our hydraulic couplers.

Type H1/S

Hydraulic-Type Grease Nipples with Self-Forming Thread

- according to DIN 71412
- straight version A/180°
- with self-forming thread, tapered
- standard version made of steel, case-hardened according to DIN (650HV) and yellow passivated

UMETA HYDRAULIC-TYPE GREASE NIPPLES - DRIVE-IN VERSION

APPLICATION AREA

By using UMETA grease nipples with drive-in shank, you effectively save the thread-cutting process in the borehole.

VERSIONS

Drive-in nipples as standard version are with plain shank, made of steel, case-hardened, zinc-plated and passivated. Upon request, UMETA manufactures drive-in grease nipples in other versions, with respect to the following:

- dimension
- material
- shank length
- shank type (e.g. serrated ridge)
- shank diameter
- surface colour
- further surface treatment

MOUNTING INSTRUCTIONS

For straight-type grease nipples, we recommend using the drive-in tool, with which the nipple can be driven-in effectively and with care. The exact size of the core hole depends on the material and must be determined by mounting tests. The standard gauge for the installation bore diameter corresponds to the nominal width of the shank $\varnothing$.

OPERATING INSTRUCTIONS

Since this type of grease nipple is only driven in, it may get loose by

- strong vibrations
- high back-pressure when greasing with auto-matic guns
- pulling off the hydraulic coupler

Drive-in type hydraulic grease nipples should only be lubricated by a hydraulic nozzle.

RECOMMENDATION

Drive-in type grease nipples are only suitable for low pressures. Please check whether they can be replaced by self-forming nipples for a better fit.

UMETA HYDRAULIC-TYPE GREASE NIPPLES - SPECIAL DESIGNS

The following types are representing only the most commonly used special-type nipples. For individual applications, UMETA manufactures hydraulic-type grease nipples with special equipment in other versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with tapered thread)
- length

High-pressure hydraulic-type nipple with pin valve

- straight version A/180°
- made of steel, zinc-plated and passivated
- with special pin valve

Due to the special pin valve, the lubrication point will be sealed hermetically after the greasing operation. As a result, internal impulse-like pressures up to 400 bar (5,800 PSI) can be attained, depending on the respective application.

APPLICATION AREA

Heavy Industry, Heavy Vehicle Industry.

■ UMETA BALL-TYPE GREASE NIPPLES ACCORDING TO FORMER DIN 3402

APPLICATION AREA

UMETA ball-type nipples are suitable for all standard lubrication points, which have to be frequently lubricated in a reliable way. They are more and more often replaced by hydraulic-type grease nipples according to DIN 71412 due to their manifold application purposes.

VERSIONS

In general, our ball-type grease nipples according to DIN are made of steel, zinc-plated and passivated, and they are featured with a tapered thread. The head diameter is 6.5 (-0.2) mm / 0.256" (-0.008"). We offer various standard types also in brass or stainless steel 1.4305 ~ ASTM 303 and 1.4404 ~ ASTM 316L (V2A/V4A). Of course, our ball-type grease nipples are also available in different angle versions, or as drive-in type.

On request, UMETA manufactures ball-type nipples in other versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with cylindrical thread)
- opening pressure
- surface colour (e. g. yellow passivated)
- further surface treatment
- etc.

OPERATING INSTRUCTIONS

As suitable lubricating nozzle, we recommend our hollow-type nozzles or hydraulic nozzles by using our push-type grease guns type A+B.

UMETA BALL-TYPE GREASE NIPPLES - DRIVE-IN VERSION

APPLICATION AREA

By using UMETA grease nipples with drive-in shank, you effectively save the thread-cutting process in the borehole.

VERSIONS

Drive-in nipples as standard version are with plain shank, made of steel, zinc-plated and passivated. Upon request, UMETA manufactures drive-in grease nipples in other versions, with respect to the following:

- dimension
- material
- shank length
- shank type (e. g. serrated ridge)
- shank diameter
- surface colour
- further surface treatment

MOUNTING INSTRUCTIONS

For straight-type grease nipples, we recommend using the drive-in tool, with which the nipple can

be driven-in effectively and with care.

The exact size of the core hole depends on the material and must be determined by mounting tests.

The standard gauge for the installation bore diameter corresponds to the nominal width of the shank $\varnothing$.

Drive-in tool

OPERATING INSTRUCTIONS

Since this type of grease nipple is only driven in, it may get loose by

- strong vibrations
- high back-pressure when greasing with automatic guns
- pulling off the hydraulic coupler.

Drive-in type hydraulic grease nipples should only be lubricated by a hydraulic nozzle.

RECOMMENDATION

Drive-in type grease nipples are only suitable for low pressures. Please check whether they can be replaced by self-forming nipples for a better fit.

Type K1a

UMETA FLUSH-TYPE GREASE NIPPLES ACCORDING TO DIN 3405

APPLICATION AREA

Flush-type grease nipples are particularly suitable for installations where extending or protruding nipples cannot be used.

VERSIONS

In general, our flush-type grease nipples according to DIN are made of steel, zinc-plated and passivated, and they are featured with a cylindrical thread. Of course, our flush-type nipples are also available in different angle versions, with a self-forming thread, or as drive-in type. We offer various standard types also in brass or stainless steel 1.4305 ~ ASTM 303 (V2A).

Upon request, UMETA manufactures flush-type grease nipples

in other versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with tapered thread)
- opening pressure
- surface colour (e. g. yellow passivated)
- further surface treatment
- etc.

OPERATING INSTRUCTIONS

Flush-type nipples are only suitable for press-greasing by means of a UMETA extension tube or a UMETA push-type grease gun with pin-pointed, pointed, or combi-nozzle.

Type D1

Flush-Type Grease Nipples

- according to DIN 3405
- straight version A/180°
- standard versions according to DIN are made of steel, zinc-plated and passivated, with cylindrical thread
- for other types and materials, please see table, or upon request

■ FLUSH-TYPE GREASE NIPPLES WITH SELF-FORMING THREAD

APPLICATION AREA

By using UMETA grease nipples with self-forming thread (SFT / SFG) you effectively save the thread-cutting process in the borehole.

VERSIONS

For safety reasons and in order to avoid abrasion wear, the DIN standard for grease nipples with self-forming thread demands a specific surface hardness of 650 HV minimum as well as a particularly wide flank angle of 105° at the thread. Therefore, we operate this decisive process in our own curing oven. For a better visual distinction, UMETA self-forming grease nipples are yellow passivated. Upon request, they are also available in another surface colour, e. g. blue passivated = silver coloured.

MOUNTING INSTRUCTIONS

The special thread angle and the specific hardness level allow these grease nipples to be driven and screwed into holes without prior thread cutting. Thus, the thread of the grease nipple forms its counter thread. Later, the grease nipple can easily be screwed out and be replaced by a standard grease nipple. The exact size of the core hole depends on the material and must be determined by mounting tests. The consistency of the receiving material is decisive. The standard gauge for the installation bore diameter of 0.4-0.5 mm (0.02") below nominal width have proved in daily use.

OPERATING INSTRUCTIONS

As suitable lubricating nozzle, we recommend our pointed nozzles.

Type D1/S

Flush-Type Grease Nipples with Self-Forming Thread

- according to DIN 3405
- straight version A/180°
- with self-forming thread, tapered
- standard version made of steel, case-hardened according to DIN (650HV) and yellow passivated

FLUSH-TYPE GREASE NIPPLES - DRIVE-IN VERSION

APPLICATION AREA

By using UMETA grease nipples with drive-in shank, you effectively save the thread-cutting process in the borehole.

VERSIONS

Drive-in nipples as standard version are with plain shank, made of steel, zinc-plated and passivated. Upon request, UMETA manufactures drive-in grease nipples in other versions, with respect to the following:

- dimension
- material
- shank length
- shank type (e. g. serrated ridge)
- shank diameter
- surface colour
- further surface treatment

MOUNTING INSTRUCTIONS

The exact size of the core hole depends on the material and must be determined by mounting tests. The standard gauge for the installation bore diameter corresponds to the nominal width of the shank Ø.

RECOMMENDATION

Drive-in type grease nipples are only suitable for low pressures. Please check whether they can be replaced by self-forming nipples for a better fit.

OPERATING INSTRUCTIONS

Since this type of grease nipple is only driven in, it may get loose by

- strong vibrations
- high back-pressure when greasing with automatic guns

Drive-in type grease nipples, flush-type, should only be lubricated by a pointed nozzle.

Type D1a

Flush-Type Grease Nipples - Drive-in Version

- according to DIN 3405
- straight version A/180°
- drive-in-type with plain shank

■ UMETA BUTTON-HEAD GREASE NIPPLES ACCORDING TO DIN 3404

APPLICATION AREA

UMETA button-head grease nipples are particularly suitable for lubricating points with a big grease volume because of their specific high flow-rate of grease. As another result of the robust construction, these grease nipples are preferably used in the construction machinery.

VERSIONS

The UMETA button-head grease nipples are available in four different sizes:

- head Ø 10 mm = M4
- head Ø 16 mm = M1
- head Ø 22 mm = M22
- head hexagon-type, Hex size 15 mm = T1

In general, our button-head grease nipples according to DIN are made of steel, zinc-plated and passivated, and they are featured with a cylindrical thread. We offer various standard types also in brass or stainless steel 1.4305 ~ ASTM 303 and 1.4404 ~ ASTM 316L (V2A/V4A).

Upon request, UMETA manufactures button-head grease nipples in other versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with tapered thread)
- opening pressure
- surface colour (e. g. yellow passivated)
- further surface treatment
- etc.

MOUNTING INSTRUCTIONS

In order to allow for a proper lubrication with all common grease guns, the head space, which is necessary for installation, should be considered (please see table with dimensions).

OPERATING INSTRUCTIONS

As suitable lubricating nozzle, we recommend our button-head coupler.

Type M4

Button-Head Grease Nipples

- head Ø 10 mm
- according to DIN 3404
- straight version A/180°

Button-Head Grease Nipples

- hexagonal head form, Hex size 15 mm
- round collar, Ø 14.5 mm
- straight version A/180°
- standard version made of steel, zinc-plated and passivated, with cylindrical thread
- for other types and materials, please see table, or upon request

BUTTON-HEAD GREASE NIPPLES - SPECIAL DESIGNS

The following types are representing only the most commonly used special-type nipples.
For individual applications, UMETA manufactures button-head grease nipples with special equipment in other versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with tapered thread)
- length
- etc.

Button head grease nipple with check valve

Type M1 or Type M22

- Type M1, head-Ø 16 mm or Type M22, head-Ø 22 mm
- straight version A/180°
- made of steel, zinc-plated and passivated, with tapered thread
- as high-pressure version with pin valve upon request

APPLICATION AREA

Due to the special check valve, the lubricating point will be sealed hermetically after the greasing operation. As a result, internal impulse-like pressures up to 1.000 bar (14,500 PSI) can be attained, depending on the respective application. Particularly suitable for the Heavy Industry, Heavy Vehicle Industry.

Button-head grease nipple with screwable protection cap

Type M1

- head Ø 16 mm
- straight version A/180°
- with o-ring for sealing against dust and humidity
- with cylindrical thread

APPLICATION AREA

For additional locking against internal pressure and as protection against contamination. Particularly suitable for plant engineering valves and for exposed lubricating points.

Button head grease nipple with extension

Type M1

- head Ø 16 mm
- straight version A/180°
- made of steel, zinc-plated and passivated
- head hardened according to DIN with cylindrical thread
- with press-fitted extension for exact grease flow

APPLICATION AREA

For deep seated lubrication points, which can be serviced sufficiently through the extension, e. g. for drive shafts.

UMETA BAYONET GREASE NIPPLES

APPLICATION AREA

An especially strong and reliable connection with the grease nipple will be achieved by using the bayonet coupler. The construction design also results in a specific high flow-rate of grease. Particularly suitable for the Heavy Industry, for example Ship Building.

VERSIONS

In general, our bayonet nipples are made of steel, zinc-plated and passivated, and they are featured with a tapered thread. We offer various standard types also in brass or stainless steel 1.4305 ~ ASTM 303 (V2A). Upon request, UMETA manufactures bayonet grease nipples in other versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with cylindrical thread)
- opening pressure
- etc.

OPERATING INSTRUCTIONS

As suitable lubricating nozzle, we recommend our bayonet coupler.

Type B1

Bayonet Grease Nipples

- head Ø 9.9 mm
- straight version A/180°
- standard version made of steel, zinc-plated and passivated, with tapered thread
- for other types and materials, please see table, or upon request

UMETA GREASE NIPPLE ASSORTMENTS

UMETA's variety of grease nipple attachments can be trusted to always have the right one available. The kits carry an assortment that should cover all application purposes. In case you require a different assortment, UMETA will be happy to handle this on a case to case basis requiring a minimum order.

■ UMETA ACCESSORIES FOR GREASE NIPPLES

UMETA Plastic Protection Caps

- suitable for grease nipples with hydraulic head according to DIN 71412
- suitable for a temperatur of approx. - 70°C up to + 85°C

The protection caps are available with or without straps and in various colours. They are used for protecting the lubricating point against contamination and for indicating the lubricating intervals by colour coding.

UMETA Rubber Protection Caps

- suitable for grease nipples with button head M1 according to DIN 3404

suitable for grease nipples with	Ref.- No.:
button head M1 according to DIN 3404	9500210

UMETA Alu Protection Caps

- suitable for grease nipples with hydraulic-type or button-head according to DIN 71412 and DIN 3404
- suitable for a temperatur of - 30°C up to + 120°C

For an especially easy clip-on and take-off. Optionally our aluminium protection caps can be anodised in colours for indicating the lubricating intervals.

suitable for grease nipples with	Ref.- No.:
hydraulic head according to DIN 71412	9500200
button head M1 according to DIN 3404	9500201

UMETA Drive-in Tool

- for safe drive-in of straight drive-in or serrated ridge nipples

suitable for grease nipples with	Ref.- No.:
ball-type or hydraulic head according to DIN	5800058
ball-type or hydraulic head according to SAE	5800059

■ UMETA GREASE FITTINGS ACCORDING TO SAE J-534

VERSIONS

In general, our grease fittings according to SAE are made of steel, case hardened, zinc-plated, passivated and featured with a special surface treatment. For safety reasons and in order to avoid abrasion wear, the standard for SAE-grease fittings demands a specific surface hardness of 83 HR15 N minimum according to Rockwell hardness test procedure.

SPECIAL INFORMATION

For a better overview we added the international Alemite-reference numbers to our grease fittings.

A general comparison of the relevant types you will find on page 78.

OPERATING INSTRUCTIONS

As suitable lubricating nozzle for our hydraulic-type fittings, we recommend our hydraulic couplers.

■ UMETA HYDRAULIC-TYPE GREASE FITTINGS ACCORDING TO SAE J-534

The SAE-standard for hydraulic-type grease fittings requires a tapered thread. The standard head-Ø is 6.6 (+/- 0.3) mm / 0.26" (+/- 0.012").

Type H1

Hydraulic-Type Grease Fittings

- according to SAE J-534
- straight version A/180°
- standard versions according to SAE are made of steel, hardened, zinc plated, passivated and top coated
- salt spray resistance > 72 hours

■ HYDRAULIC GREASE FITTINGS WITH SELF-FORMING THREAD ACCORDING TO SAE J-534

VERSIONS

For safety reasons and in order to avoid abrasion wear, the standard for SAE-grease fittings demands a specific surface hardness of 83 HR15 N minimum according to Rockwell hardness test procedure. Furthermore, a particularly wide flank angle of 90° at the thread is stipulated therein. For a better visual distinction, UMETA self-forming grease fittings are yellow passivated. Upon request, they are also available in another surface colour, e. g. blue passivated = silver coloured.

Type H1/S

Hydraulic-Type Grease Fittings with Self-Forming Thread

- according to SAE J-534
- straight version A/180°
- with self-forming thread, tapered
- standard version made of steel, according to SAE hardened, yellow passivated and top coated
- salt spray resistance > 72 hours

MOUNTING INSTRUCTIONS

The exact size of the core hole depends on the material and must be determined by mounting tests. The consistency of the receiving material is decisive. The standard gauge for the installation bore diameter of 0.4-0.5 mm (0.02") below nominal width have proved in daily use. The recommended borehole Ø is listed with the part number.

OPERATING INSTRUCTIONS

As suitable lubricating nozzle, we recommend our hydraulic couplers.

■ UMETA HYDRAULIC-TYPE GREASE FITTINGS - DRIVE-IN VERSION (USA VERSION)

VERSIONS

Drive-in fittings as standard version are made of steel, case-hardened, zinc-plated, passivated and top coated.

MOUNTING INSTRUCTIONS

The exact size of the core hole depends on the material and must be determined by mounting tests. The standard gauge for the installation bore diameter corresponds to the nominal width of the serrated ridge-Ø.

OPERATING INSTRUCTIONS

Since this type of grease fitting is only driven in, it may get loose by

- strong vibrations
- high back-pressure when greasing with automatic guns
- pulling off the hydraulic coupler.

Drive-in type hydraulic grease fittings should only be lubricated by a hydraulic nozzle.

Type H1a

Hydraulic-Type Grease Fittings - Drive-in Type

TURNED PARTS

From prototype to series production-readiness!

Umeta is the right partner for you and your turned parts projects. We support you from the very first development stage through initial sampling right up to series production-readiness.

Manufacturing special turned parts is one of our strengths, whether in small or large series. Our machinery consists of long CNC-controlled lathes and capstan lathes. We also provide assembly services and the manufacture of complete component groups as an option. This means we can offer complex machining facilities.

You will find locking plugs and air release valves in the standard programme of our turned parts division, and we would like to show you a few samples of further production facilities below.

UMETA TURNED PARTS AT A GLANCE

- production batches from 1 piece
- raw material measurements from Ø 3 mm to Ø 42 mm
- turning lengths up to 600 mm
- machining of all removable materials
- high-precision production of complex contours (tolerance ranges of 0.02 mm and a surface roughness Rz of 1.0 µm are possible)
- axial and radial milling / drilling with lathing of bars
- eccentric drilling with axial machining
- extensive machining of front and back sides with lathing of bars
- changes in machining contours can be realised quickly and economically by programming the parameters

EXAMPLES OF MACHINING FACILITIES

chain tensioner

(machining of front, back, air release groove)

bayonet top

(radial milling of shell)

clamping hydraulic body

(radial two-step drilling/apply to spanner flat)

injection nozzle

(axial/radial machining, long turned parts, assembling)

AIR BLEED VALVES

The standard air bleed valves for venting and avoidance of undesirable pressure increases are zinc-plated and passivated, and they are featured with a tapered thread. The following types are representing a selection of the most commonly used air bleed valves.

Upon request, UMETA manufactures air bleed valves in other versions, with respect to the following:

- opening pressure
- dimension
- material
- thread size
- thread form (e. g. with cylindrical thread)
- further surface treatment
- etc.

Air bleed valves

- for venting gears
- for the avoidance of undesirable pressure increases in universal joints
- made of steel, zinc-plated and passivated, with tapered thread
- for other types and materials, please see table, or upon request

LOCKING PLUGS

The standard locking plugs for closure of bore-holes are made of steel, zinc-plated and passivated, and they are featured with a tapered thread.

The following types are representing a selection of the most commonly used locking plugs.

Upon request, UMETA manufactures locking plugs in further versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with cylindrical thread)
- length
- etc.

Locking Plugs

- for subsequent closing of boreholes
- made of steel, zinc-plated and passivated, with tapered thread
- for other types and materials, please see table, or upon request

Locking Plugs with Self-Forming Thread

- for subsequent closing of boreholes
- standard version made of steel, case-hardened according to DIN (650 HV) and yellow passivated
- with self-forming thread

APPLICATION AREA

By using UMETA locking plugs with self-forming thread (SFT/SFG) you effectively save the thread-cutting process in the borehole.

MOUNTING INSTRUCTIONS

The special thread angle and the specific hardness level allow these plugs to be driven and screwed into boreholes without prior thread cutting.

Thus, the thread of the plug forms its counterhead. Later, the plug can easily be screwed out and be replaced by a standard locking plug. The exact size of the core hole depends on the material and must be determined by mounting tests. The consistency of the receiving material is decisive. The standard gauge for the installation bore diameter of 0.4-0.5 mm (= 0.02") below nominal width have proved in daily use.

Caution! Safety Information

It is imperative that you observe the following information:

UMETA grease guns can achieve a lubrication pressure of over 800 bar / 11,600 PSI.

For this reason, please ensure that all components are designed for this high pressure.

Service your UMETA products regularly!

Before using them first, check all connections for tight fit and only use components which do not show any signs of damage.

Never point the discharge opening at yourself or at other people.

Never hold onto hoses under pressure and never loosen connections which are under pressure.

Hoses are subject to a severe ageing process!

For this reason you should always replace hoses after three years at the latest. Hoses may never be buckled or bent with force. The smallest bending radius is 100 mm.

UMETA compressed air guns may never be operated under more than 10 bar / 145 PSI air pressure.

Special lubricating nipples may be required for lubrication using automatic lubricating equipment. Always inform yourself in advance about the maximum permissible pressure!

Only use UMETA products with original UMETA accessories which are intended for this purpose. Modifications to UMETA Products can lead to severe damage or injuries. If you are injured, consult a doctor immediately!

UMETA products may never be brought into contact with hazardous or aggressive materials.

General Information

We reserve the right to make changes to products with regard to technical properties, dimensions and materials, and to remove products from our range.

Products may deviate from catalogue illustrations in their design, colour and size.

Supply of turned parts takes place in accordance with our „Technical terms of delivery for turned parts“, which you can find in the download area of our Internet site.

Furthermore our General Conditions of Sale, which are on the back of our business paper and on our Internet site, apply to all deliveries.

Our 4 years guarantee is subject to our guarantee terms and conditions which can be found at www.umeta.com

We accept no liability for any errors or omissions.
